MARKETING RELEASE

Release of Consolidated® SRVS™ Version 6.2 Sizing and Selection Program

Dresser Consolidated is pleased to announce the release of the Consolidated® SRVS6.2 sizing and selection program for pressure relief valves, effective June 30, 2006. This version replaces SRVS6.1.1c. The program is compatible with Windows 9x, 2000, and XP. The program can be downloaded from the Dresser website via the following path: www.dresser.com > Brands > Consolidated > Valve Sizing Programs.

New features in SRVS6.2 include:

- 1) Improved reporting module, including:
 - a. Revised valve data and calculation pages.
 - b. Combined drawing and bill of materials pages with full-color detailed cross-section drawings, including drawings for the 2900 and 4900 valve series.
 - c. Schematic page for 3900 and 2900 POSRVs showing a piping schematic for the selected valve accessories.
 - d. Ability to save reports as an Adobe® PDF file.
- 2) Ability to change user information (name, address, language) after the first run of the program, and set up more than one user profile.
- 3) Addition of the 49PV37 pilot.
- 4) Addition of 2900 and 4900 valve dimensions.
- 5) Improved French language setting.
- 6) Noise level calculation for vapors and gases at varying distances per API 521.
- 7) More precise conversion of units of measurement.
- 8) Improved o-ring/alternate material selection.
- 9) Addition of Duplex material variations for 1900, 2900, 3900, and 4900 valve series.
- 10) Addition of 1912T valve.
- 11) Heat exchanger sizing to produce exit temperature, part number, and quantity of heat exchangers required.
- 12) An option to preserve previously selected valve options and/or special materials when a valve is resized.

SRVS6.2 offers improved performance and user interface:

Over sixty additional modifications and corrections have been made to improve software performance and enhance user interface. SRVS6.2 is a user-friendly program with extensive help files and detailed full-color certified drawings.
